

Pavo NervControl

For calmness in sensitive and nervous horses

Is your horse easily spooked and nervous? Pavo NervControl is a doping-free product that stimulates calmness in a natural way. By supporting the signal transmission of the nerves, tension is reduced more easily. Vitamin B12 plays a role in the nerve conductor and is produced a gut bacteria that needs cobalt for this purpose.

For calmness in nervous horses

Essential amino acids, such as tryptophan and threonine, are required for production of the hormones serotonin and melanin that have a calming and anxiety-reducing effect in the brain. Selenium has been added and the content of magnesium has been increased. For optimum intake while maintaining palatability, three forms of magnesium are used. Humane studies into magnesium and selenium have shown that these substances have an anxiety reducing effect.

Pavo NervControl does not contains wheat, so it is also suitable for horses that are sensitive to gluten.

Available in a 3 kg bucket with sealable lid.

Important characteristics

- For increased calmness in nervous horses
- Helps to reduce tension in the body more quickly
- For better control in stressful situations
- Contains organically bound magnesium, L-tryptophan and threonine
- Doping-free and with a natural effect

Application

- For sensitive and nervous horses

Feeding advice

Pavo NervControl can be given for a long period of time.

- Horse (approx. 600 kg): 100 grams per day
- Pony (approx. 300 kg): 50 grams per day

Pavo NervControl

For calmness in sensitive and nervous horses

Product Specifications

Contains

Lucerne (alfalfa)
Rye middlings
Calcium carbonate
Magnesium phosphate
Magnesiumacetate
Linseedoil
Dextrose

Package

Bucket 3 kg

Storage advise

Store in a cool, dry and dark place.
Reclose after usage
